2	Changelog	3
2.1	1.0	3
3	Tests	5
3.1	Manual tests	5
3.2	French tests	5

Plugin body

1.1 Purpose

This plugin is made to allow you to monitor some body metrics :

- weight of your body
- % of muscle in the body
- % of fat in the body
- % of water in the body
- % of bone in the body

It is not related to any connected device and so, you will have to manually give the informations to Domogik.

To allow you to easily give the informations, this plugin includes some new butler features that will allow you to just speak the data to the butler.

1.2 Plugin configuration

There is no specific configuration needed for this plugin.

1.3 Creating a device

In administration, go to **Organization > Devices** page.

You will have to create a device for each person you want to monitor.

Field	Suggested value	Description
Name	Someone name	Just set a person of your family name

1.4 Speak to the butler

1.4.1 French examples

- je pèse 70 kilos

- je fais 20 pourcents de masse graisseuse
- je fais 60 pourcents de masse aqueuse
- je fais 30 pourcents de masse musculaire
- je fais 3 pourcents de masse osseuse
- quel est mon poids
- quelle est ma masse graisseuse
- donne-moi ma masse aqueuse
- quel est mon pourcentage de muscle
- dis-moi pour pourcentage de masse osseuse

Changelog

2.1 1.0

- Plugin creation

Tests

3.1 Manual tests

For this plugin, there is no automated tests for now. For each language below, set the butler to the related language in `/etc/domogik/domogik/cfg` and try each sentence.

3.2 French tests

- see the file `tests/manual_tests-fr_FR.md`
